

IRIS Exchequer **LIVE**

 Solutions that deliver

Introducing IRIS Exchequer LIVE

LIVE is a brand new range of modules designed to enable more users based in remote locations to have easy access to their IRIS Exchequer solution.

Introducing a user experience designed to deliver an intuitive and highly functional User Interface (UI) for the IRIS Exchequer product irrelevant of where you work. Using the very latest technologies, we have created a new 'Rich Internet Application' (RIA).

This exciting new 'LIVE' range of modules will tackle head-on many of the challenges facing today's organisations where increasingly employees are required to operate away from the office whilst retaining the need for live access to vital business data.

For both office and mobile workers, LIVE is the only suite of modules that offers a fresh, new and dynamic approach to interacting with their IRIS Exchequer accounting and business solution. This means that through an all new web enabled UI, both office and mobile workers will have efficient, real-time access to information and intuitive data entry with a fluid approval system.

What makes IRIS Exchequer LIVE live?

Real-time access is the key and the range of modules have been built using the latest leading edge technologies which delivers a versatile and powerful platform.

This great new modern environment is specifically used by the world's leading software companies for building RIA's and brings a new dimension to the usability of the software application.

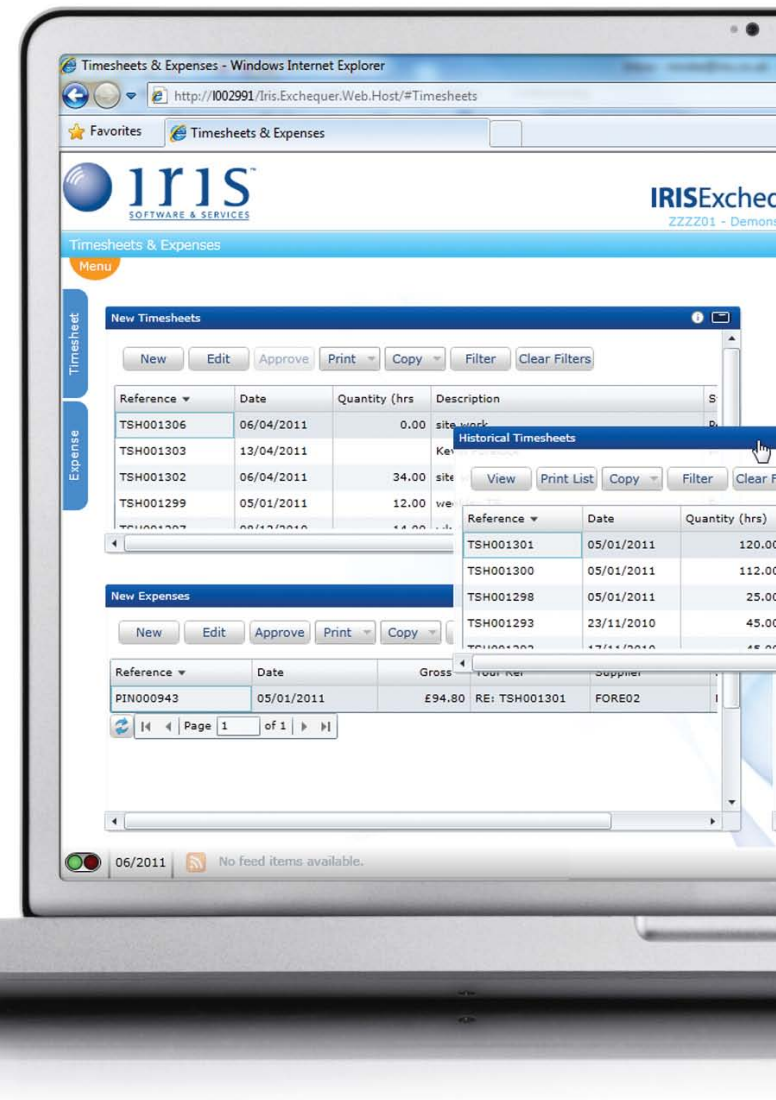

Harnessing this new technology has enabled IRIS to push previous browser boundaries and generate a totally new customer experience to complement the existing highly popular and successful IRIS Exchequer product range.

An all new intuitive panel approach gives you that important 'snapshot' view of your activities and approvers benefit from a simple but powerful KPI panel which delivers key information 'LIVE' to your personalised view.

All modules benefit from an extensive approval and authorisation system.

IRIS Exchequer LIVE modules

- LIVE Timesheets
- LIVE Expenses
- LIVE eProcurement*

LIVE Timesheets & Expenses

Does your organisation have the need to record, collate and process employees' time? Is the recording and processing of expenses for your employees overly time consuming?

If the answer is yes to either of these questions then LIVE has a solution designed to meet your needs.

LIVE brings a completely new comprehensive and multi-tiered 'Approval' and 'Authorisation' system with its own dedicated interface and approval based reporting options for Timesheets & Expenses.

The LIVE range of modules adopts a 'Role Based' approach to configuration and management which in turn increases accuracy in the recording and subsequent reporting on time and expenses.

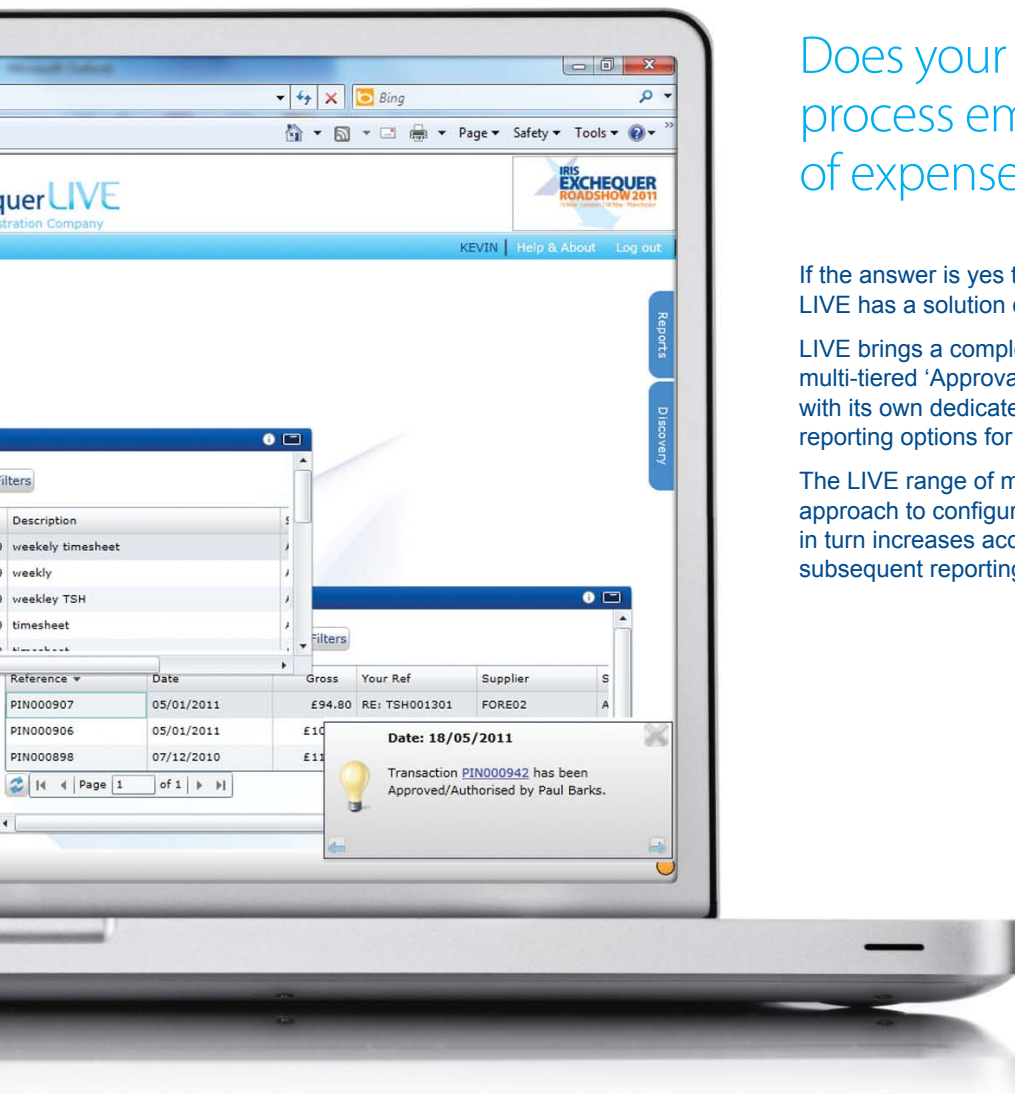

Key features

LIVE Timesheets:

- Timesheets based on role selectable templates*
- Ability to base a new timesheet on a historical timesheet
- Instigate an expense claim from a timesheet
- Hours recorded on a per day basis

LIVE Expenses:

- Configurable expense threshold limits by expense category
- Ability to record mileage
- Ability to base a new expense claim on a historical expense claim
- Notes associated with expense claim
- Instigate a timesheet from an expense claim

*Available Autumn 2011

LIVE eProcurement

Do you need to retain centralised visibility and control of local purchasing decisions and relationships, whilst giving both office and remote workers fast access to critical business?

If so, then LIVE eProcurement is your answer to delivering a sleek and efficient way to manage your business procurement needs.

Starting with initial requisitions and progressing right the way through to final invoicing, LIVE eProcurement is the ideal solution for organisations with multi-location offices, field representatives and office-based teams.

LIVE eProcurement fully supports the same familiar business logic to purchase order processing as your core IRIS Exchequer system. With LIVE you can perform stock look-ups with a new 'fuzzy logic' approach and apply a new wizard approach to receiving goods, including serial and batch items.

Key features

Transactions:

- Instigate a purchase requisition, order, delivery note or purchase invoice
- View location (depot) specific transactions
- Receive goods against purchase delivery notes
- Instigate unrelated purchase invoices and submit for approval
- Roles specific to purchasing, approvals/authorisation and goods-in

Approvals:

- Approve all or specific types of purchase transactions
- Transactions restricted from being printed until fully authorised
- Transactions flagged for approval/authorisation are compared automatically with budget and O/S commitments
- Range of specific reports showing back orders, shortages and on order

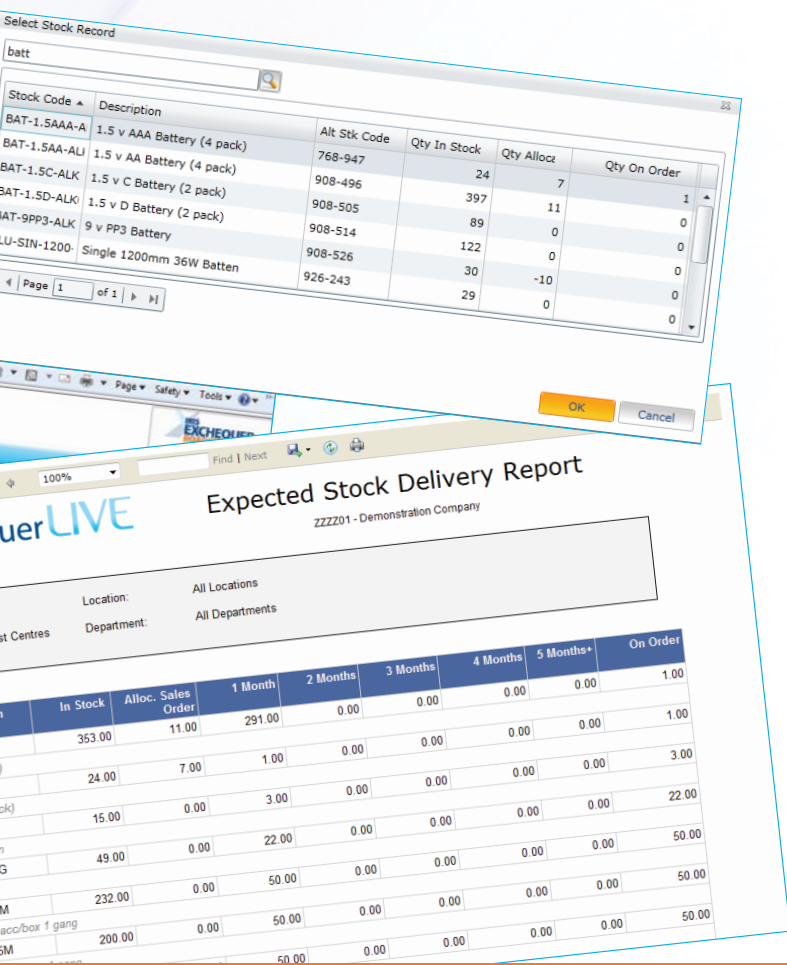

Inventory:

- Snapshot inventory viewer showing free, in stock, on order details by location
- Ability to instigate stock replenishment by stock location (depot)

LIVE General features

The following features are available as standard for all LIVE modules:

Approvals & Authorisation features

- Highly configurable, flexible approval/authorisation matrix
- Dedicated approval/authorisation user interface
- Facility to record reason for rejections
- Approval based reporting
- Email notification of approval requests for approvers

General features

- Operates via Desktop or Microsoft Internet Explorer
- Approvers RAG based budget vs actual indicator for projects or nominal accounts
- Facility to import roles which aids implementation
- All data available within IRIS Exchequer standard reporting tools
- Role associated with records in IRIS Exchequer company, such as Supplier and Employee
- Secure access to application by Microsoft Windows authentication of user ID

Reporting

Built in reports for the LIVE modules can be run at any time through the web UI and can be further exported to Microsoft Excel and Microsoft Word at the click of a button.

Your own custom Microsoft Report Builder reports can also be uploaded to the LIVE environment, giving you even more reporting options.

LIVE is available for the MS SQL edition of IRIS Exchequer. Please refer to the LIVE Technical Specification for details of full requirements.
